If the Contractor neglects, fails or refuses to complete the work as herein specified, or any proper extension thereof granted by the Owner, then the Contractor does hereby agree, as a part consideration for the awarding of this Contract, to pay to Owner the amount of \$1,000 per day, not as a penalty but as liquidated damages for such breach of Contract as hereinafter set forth, for each and every calendar day that the Contract will be in default after the date stipulated in the Contract for completing the work.

MEASUREMENT & PAYMENT

Item 1: Unclassified Excavation

This work shall consist of the excavation, removal and legal disposal of any existing subsurface soils encountered during the reclamation process deemed unsuitable for a proper functional base, as determined by the Owner.

If, in the opinion of the Owner, the material at or below finish grade for the bottom of reclaimed excavation is unsuitable for foundation, it shall be removed to such depths and widths within the limits of payment as approved by the Owner.

The unit price for this item shall constitute full compensation for excavation below finish grade and legal disposal of unsuitable material. The Contractor will not be reimbursed for over-excavating which has not been approved by the Owner. The Contractor shall backfill any such over-excavated areas in accordance with the specifications, at no additional cost to the Owner. Unclassified excavation material will become the property of the Contractor and will be disposed of legally offsite.

Once the unsuitable material has been excavated and removed, it shall be the responsibility of the Contractor to replace any removed material with the appropriate amount of replacement material, as approved by the Owner. All backfill material will be paid for under Item 3: Gravel Borrow in the Bid Form.

Measurement and payment for all unclassified excavation shall be based upon the number of cubic yards of material actually excavated in the field as approved by Owner.

Item 2: Asphalt Pavement Reclamation

This work shall consist of the reconstruction of the parking lot and driveway as specified in the Contract or as directed by the Owner. The work shall consist of scarifying, to a depth of two (2) to two and half (2.5) times the thickness of the existing pavement, the existing bituminous paved areas to form an asphaltic stabilized base. For the purpose of this specification, scarification is a general term meaning removal of a pavement surface, in accordance with the contract documents, by milling with cold planning equipment.

The mixture of scarified pavement and base shall be crushed simultaneously by traveling rotating drum, or hammer mill to blend the mixture together into a homogenous mass and stable base which bonds the material together when compacted.

The crushed materials shall meet the following gradation:

Sieve Designation	Percentage by Passing Weight
3"	100
1-1/2"	70-100
3/4"	55-90
#4	40-75
#40	10-30
#400	03-10

If necessary, or ordered by the Owner, a sieve analysis will be conducted on a sample of the reclaimed material at the Contractor's coordination and expense and considered incidental to this unit item, as set forth in the Bid Form.

The method used shall ensure that the entire mass of material shall be uniformly graded to these specifications. If additional gravel base course or fines are required, the Contractor may be directed to add material, furnished by others, or may add materials directly from the existing reclamation base with the approval of the Owner, but scarified pavement and gravel fines must be crushed and mixed together.

Excess scarified material will become the property of the Contractor and will be disposed of offsite in a legal manner, the price of which will be considered part of this unit item as set forth in the Bid Form. The Contractor will be responsible for damage to existing castings resulting from this operation unless such castings (e.g. manholes, water gates, etc.) have previously been paved over and are therefore not visible on surface.

After the material has been thoroughly worked as described, it shall be shaped and graded. Grading and finishing work shall consist of the shaping, trimming, compaction and finishing of the subgrade surface. The subgrade material shall be constructed to follow the pre-existing grades or directed by the Owner.

The restored section shall be thoroughly compacted to a dense consolidated mass by rolling with a steel wheel roller weighing not less than fourteen (14) tons.

Measurement and payment for pavement reclamation will be based upon the number of square yards actually reclaimed including dust control. The price of which shall constitute full compensation for scarifying to a minimum of two (2) to two and a half (2.5) the thickness of the pavement, or as directed by the Owner, compacted, rolled, and graded to the lines; dust control; removal and disposal of surplus materials; and all other work incidental thereto.

Item 3: Gravel Borrow

This work shall consist of the installation of additional gravel borrow as necessary to replace any excavated material, found to be unsuitable base material, as determined by the Owner. The gravel borrow shall be mixed with existing sub base material which results from the reclamation process to be a uniform mixture and provide a base for the proposed roadway surface.

Gravel borrow shall be as specified in Section M1.03.0 of the MassDOT. The gravel borrow shall consist of inert material that is hard, durable stone and coarse sand, free from loam and clay, surface coating, and deleterious material. Standard Specifications for Highways and Bridges:

Sieve Designation	Percentage by Passing Weight
1/2"	50-85
#4	40-75
#50	8-28
#200	0-10

Measurement and payment for gravel borrow shall be measured per cubic yard of material actually set in place.

Items 4: Adjustment of Structures

This work shall consist of rebuilding, removing, replacing, and adjusting the masonry and castings of present structures (manholes, catch basins, gate boxes, etc.) in accordance with these specifications and in close conformity with the lines and grades shown on the plans or established by the Owner.

All broken, damaged, and worn gate box tops, covers and structure castings, as determined by the Owner, shall be replaced with new castings supplied by the Auburn Water District. Any removal of existing or installation of new castings shall be considered incidental to structure and gate adjustments and no additional payment will be made.

All gates, manholes, and catch basins shall be cleaned of left-over construction debris; all construction debris will be removed off site and is the responsibility of the Contractor.

The price bid shall include the cost to both **lower and raise** all gate and structure castings to a depth of eighteen (18) inches or as sufficient to eliminate interference from the reclamation process. Once the binder has been placed and rolled, the buried structures shall be adjusted to the newly proposed line and grades as set forth on the Plan Set or as directed by the Owner. The structures shall be dismantled in a non-destructive manner and covered with a steel plate.

Measurement and payment shall be made based upon each structure actually adjusted, as necessary or as directed by the Owner, in the field.

Item 5: Hot Mix Asphalt (HMA), Superpave Mix Design

This work shall consist of the machine placement of HMA Superpave mix designs including both **SIC - 19.0, 100 Gyration and SSC - 9.5, 75 Gyration** courses.

The HMA pavement shall be constructed with a 2.5-inch compacted binder course and a 1.5-inch compacted top coat in close conformity with the grades shown on the plans. Unless specified otherwise, each HMA pavement course placed shall be comprised of one of the mixture types listed in Table 450.10-1 of the MassDOT Standard Specifications for Highways and Bridges.

A job mix formula for both the binder and top courses to be used throughout the entire project must be submitted to the Owner for Approval before placement of the pavement can start.

The Contractor is responsible for providing an appropriate Quality Control system to ensure that all materials and workmanship meet the required quality levels for each specified Quality Characteristic.

All joints shall be treated with a Tack Coat, including longitudinal seams.

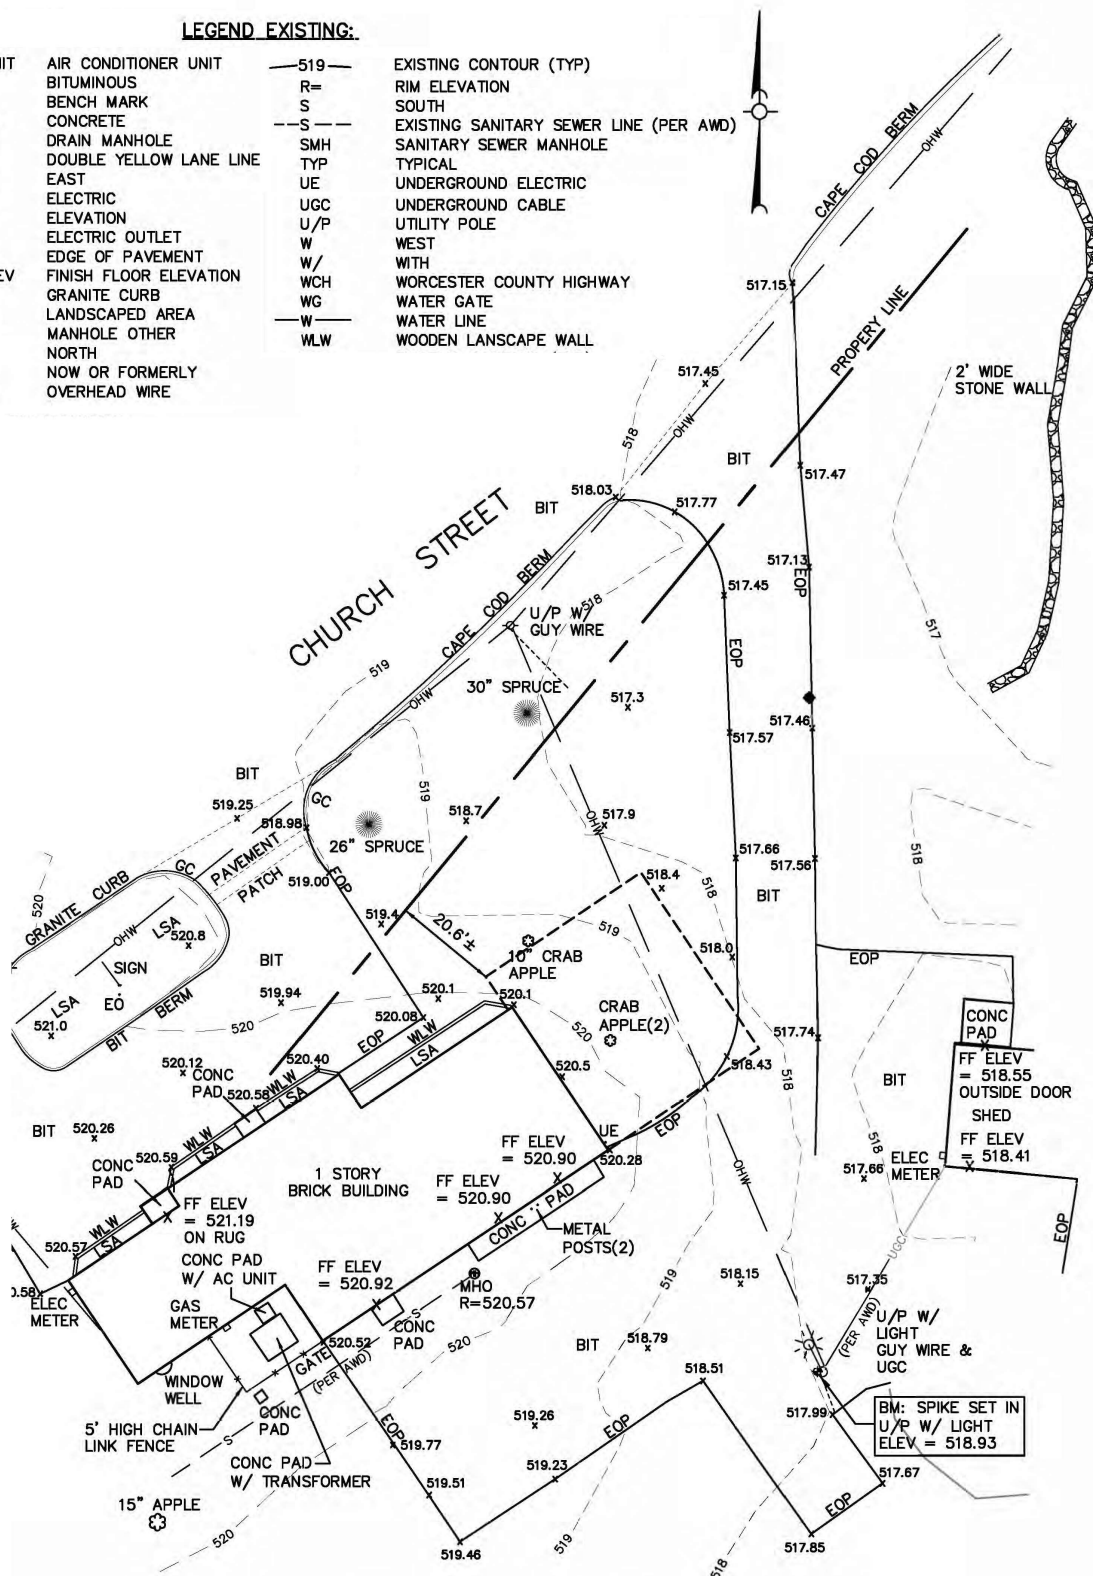

Measurement for payment for Hot Mix Asphalt Superpave mix design pavement shall be based upon the number of square yards of such material placed and rolled as measured in the field. The price of which shall constitute full compensation for removal and disposal of any temporary pavement, restoring and regarding any gravel base course, application of tack coat bleeder berm, disposal of any excess material and all work incidental thereto.

Item 7: Sawing Asphalt Pavement

This work shall consist of the cutting/sawing of existing paved surfaces to create a joint/seam in the existing asphalt surface where the existing asphalt surface shall not be removed or reclaimed.

Measurement and payment for sawing asphalt pavement shall be per linear foot for each actual foot of existing pavement cut in the field, as depicted upon the plan set or as directed by the Owner.

Awarding Authority: Auburn Water District
Contract Number: AWD-001 **City/Town:** AUBURN
Description of Work: Reclaiming and paving office parking lot
Job Location: 75 Church Street

Information about Prevailing Wage Schedules for Awarding Authorities and Contractors

- This wage schedule applies only to the specific project referenced at the top of this page and uniquely identified by the “Wage Request Number” on all pages of this schedule.
 - An Awarding Authority must request an updated wage schedule from the Department of Labor Standards (“DLS”) if it has not opened bids or selected a contractor within 90 days of the date of issuance of the wage schedule. For CM AT RISK projects (bid pursuant to G.L. c.149A), the earlier of: (a) the execution date of the GMP Amendment, or (b) the bid for the first construction scope of work must be within 90-days of the wage schedule issuance date.
 - The wage schedule shall be incorporated in any advertisement or call for bids for the project as required by M.G.L. c. 149, § 27. The wage schedule shall be made a part of the contract awarded for the project. The wage schedule must be posted in a conspicuous place at the work site for the life of the project in accordance with M.G.L. c. 149 § 27. The wages listed on the wage schedule must be paid to employees performing construction work on the project whether they are employed by the prime contractor, a filed sub-bidder, or any sub-contractor.
 - All apprentices working on the project are required to be registered with the Massachusetts Department of Labor Standards, Division of Apprentice Standards (DLS/DAS). Apprentice must keep his/her apprentice identification card on his/her person during all work hours on the project. An apprentice registered with DAS may be paid the lower apprentice wage rate at the applicable step as provided on the prevailing wage schedule. **Any apprentice not registered with DLS/DAS regardless of whether or not they are registered with any other federal, state, local, or private agency must be paid the journeyworker's rate for the trade.**
 - The wage rates will remain in effect for the duration of the project, except in the case of multi-year public construction projects. For construction projects lasting longer than one year, awarding authorities must request an updated wage schedule. Awarding authorities are required to request these updates no later than two weeks before the anniversary of the date the contract was executed by the awarding authority and the general contractor. For multi-year CM AT RISK projects, awarding authority must request an annual update no later than two weeks before the anniversary date, determined as the earlier of: (a) the execution date of the GMP Amendment, or (b) the execution date of the first amendment to permit procurement of construction services. Contractors are required to obtain the wage schedules from awarding authorities, and to pay no less than these rates to covered workers. The annual update requirement is not applicable to 27F “rental of equipment” contracts.
 - Every contractor or subcontractor which performs construction work on the project is required to submit weekly payroll reports and a Statement of Compliance directly to the awarding authority by mail or email and keep them on file for three years. Each weekly payroll report must contain: the employee’s name, address, occupational classification, hours worked, and wages paid. Do not submit weekly payroll reports to DLS. A sample of a payroll reporting form may be obtained at <http://www.mass.gov/dols/pw>.
 - Contractors with questions about the wage rates or classifications included on the wage schedule have an affirmative obligation to inquire with DLS at (617) 626-6953.
 - Employees not receiving the prevailing wage rate set forth on the wage schedule may report the violation to the Fair Labor Division of the office of the Attorney General at (617) 727-3465.
 - Failure of a contractor or subcontractor to pay the prevailing wage rates listed on the wage schedule to all employees who perform construction work on the project is a violation of the law and subjects the contractor or subcontractor to civil and criminal penalties.
